

# Bulk Mailbox Management for GroupWise

Use Riva from Omni to bulk manage GroupWise mailboxes. Need to push calendars, proxy access, rules, address books and more to multiple users? Need to control who can send email to a GroupWise distribution list? Riva is your bulk mailbox management solution for GroupWise.

## Riva Managed Policies

Riva Managed Policies allow administrators to automate GroupWise management by creating policies that dynamically create and update GroupWise information.

- Riva Managed Calendars
- Riva Managed Proxy Access
- Riva Managed Rules
- Riva Managed Folders
- Riva Managed Address Books
- Riva Managed Categories
- Riva Folder Create
- Riva Birthday Reminder
- Riva Password Expiry Reminder Email
- Riva Internet Address Clean-up

## Riva Managed Applications

Enforce email signature and disclaimer policies, create secure GroupWise distribution lists, manage external domains and deliver identity integration for Active Directory and GroupWise.

- Riva Managed Signatures
- Riva Secure Distribution Lists
- Riva Dynamic Distribution Lists
- Riva Managed External Domains

## Riva Reports for GroupWise

Riva Reports provide quick and easy access to GroupWise report information that is not available using standard GroupWise administration tools or GWCheck.

- GroupWise Archive Path Report
- GroupWise Proxy Report
- GroupWise Rules Report
- Shared Address Books Report
- Shared Folders Report
- Shared Calendars Report
- eDirectory Account Audit Report

### FLEXIBLE LICENSING OPTIONS:

Omni provides the ultimate flexibility in Riva pricing and licensing. License single Riva Managed Policies, Applications or Reports or purchase our value-packed Riva Bundles. You only license Riva for the accounts you wish to manage.

## Manage GroupWise with Active Directory!

Migrating from NetWare to Windows Server but want to keep GroupWise?

**Riva Identity Integration** is an Active Directory to eDirectory/GroupWise identity synchronisation solution. Use Riva to manage Active Directory, eDirectory and GroupWise from Microsoft Management Console.

**Experience the Power of Simplicity!**

- **NO** Active Directory or eDirectory schema extensions.
- **NO** complex designer tools, connectors or scripting languages to learn.
- **NO** knowledge of internal LDAP or directory attributes is required.
